MOTO™ VE538

Life is Mobile, Stay Connected
Motorola MOTO VE538 helps users stay connected to what's most important - life - anywhere, anytime. Create pictures and videos with the 2-megapixel camera and then upload them quickly to favorite social networking sites via the 3G network[1].

Social Networking and Blogging Made Mobile
Connecting to social networking Web sites no longer requires a PC. A dedicated key gives one-click access to ShoZu[2], the gateway to social networking sites, and enables you to update your profile, comment on friends' pictures, capture and upload pictures and videos—which can be posted to your online communities— and blog all while on-the-go.[1]

Discover, Create and Share at 3G speed
MOTO VE538 uses 3G technology for lightening-fast Internet access and connectivity so users are never out of touch[1]. Loaded with a full MP3 player and the ability to drag and drop tracks[3] with USB 2.0 Full Speed, MOTO VE538 enables users to play VMV and WMA tracks. Capture and share priceless moments with 3G Video Calling[1,4] that uses a second VGA camera. And there's no need to worry about storage space, with up to 4GB of optional removable memory[8], store all your messages, music, pictures and video clips after capturing, downloading[1] or synching with your library[5].

MOTO VE538

Certain mobile phone features are dependent on the capabilities and settings of your service provider's network. Additionally, certain features may not be activated by your service provider, and/or their network settings may limit the feature's functionality. Always contact your service provider about feature availability and functionality. All features, functionality and other product specifications are based upon the latest available information and are believed to be accurate; however such product specifications are subject to change without notice or obligation.

[1] Network and/or subscription dependent feature, not available in all areas. Airtime, data charges and/or additional charges may apply.
[2] Feature not available in all regions
[3] "Drag and drop tracks" refers to transferring music from PC to phone. microSD™ cable required.
[4] Video Calling requires that the recipient have a video call capable phone as well.
[5] The unauthorized copying of copyrighted materials is contrary to the provisions of the Copyright Laws of the United States and other countries. This device is intended solely for copying non-copyrighted materials, materials in which you own the copyright, or materials which you are authorized or legally permitted to copy. If you are uncertain about your right to copy any material, please contact your legal advisor.
[6] All talk and standby times are quoted in Digital Mode, and are approximate. Battery performance depends on network configuration, signal strength, operating temperature, features selected, and voice, data and other application usage patterns.
[7] This device supports Bluetooth A2DP and AVRCP profiles. In order for Bluetooth devices to communicate with one another, they must utilize the same Bluetooth profile. To determine the profiles supported by other Motorola devices, visit www. motorola.com/bluetooth. For other devices, contact their respective manufacturer.
Certain Bluetooth features including those listed may not be supported by all compatible Bluetooth-enabled devices, and/or the functionality of such features may be limited in certain devices, or by certain wireless carriers. Contact your wireless carrier about feature availability and functionality.
[8] Available user memory varies due to the configuration of the phone, which varies by service provider.
[9] 1GB = 1 billion bytes; actual usable memory after formatting is less
